

Choose eakin dot[®] 2-piece for peristomal skin problems

4 reasons to use:

1. Choosing the correct appliance is an important aspect in a person's overall recovery after ostomy surgery.¹
2. The goal of both nurse and patient is to achieve a predictable, reliable wear time.²
3. Peristomal skin irritation is a very common early complication when managing a stoma.
4. Peristomal skin problems can be corrected with the appropriate pouching system.^{3,4}

Case study submitted by:
Bataa EL-Erakey, Stoma Nurse,
Australia

Patient History:

- Mr PF had a history of rectal cancer
- APER with formation of end colostomy
- Discharged from hospital using 1-piece convex drainable pouch

Problems:

- Alternating bowel motion from loose to solid
- Difficult to drain pouch when output solid
- Too many pouch changes when output loose
- Has had leakages
- Has developed peristomal skin excoriation

Nurse review:

- Peristomal skin **excoriated**
- Feels **uncomfortable**
- **Leakages** due to unpredictable output
- **Difficulty** in placing 1-piece accurately

Nurse recommends eakin dot[®] 2-piece:

- **Flexible** pouch options to cater for differences in output
- **skinsmart[™]** hydrocolloid extends wear time
- **Easy accurate** placement of baseplate **reduces peristomal skin problems** and **prevents leakages**

Outcome:

- Peristomal skin **improved**
- **No leakages**
- **Ease of use**
- **Able to alternate** between closed and drainable pouches depending on output

A SMALL PART
OF A BIGGER LIFE

Clinical evidence for choosing eakin dot[®] 2-piece:

- Improves peristomal skin problems
- Ease of use
- **skinsmart[™]** hydrocolloid for longer-life wear
- Meets the individual needs of ostomates
