

Choose eakin dot® 1-piece for fragile skin*

***The patient in this case study was assessed and advised by a stoma therapy nurse.**

4 reasons to use:

1. Stays on securely for longer, helping prevent leaks^{1,2}
2. Less time spent on pouch changes^{1,2}
3. Improved peristomal skin^{1,2}
4. Improved quality of life^{1,2}

Patient History:

- 82-year-old gentleman
- Diabetic
- 1993: Stroke and triple bypass
- 2015: AAP (Amputation abdomino-périnéale) removal of anus and rectum
- Liver cirrhosis and portal hypertension

Problems:

- Parastomal hernia
- Enlarged stoma - 70mm in diameter
- Caput medusae
- Granulomas
- Difficulty managing stoma independently due to distension and situated low on the abdomen
- Regular pouch leaks

Success with eakin dot® 1-piece:

- Switched to eakin dot® 1-piece drainable, with flange extenders also used occasionally.
- eakin dot® was chosen due to the effective adhesive properties combined with skin friendliness. The fluted edges adapt very well to the concave shape of the abdomen.
- Patient experiences no leaks and can empty the pouch independently.

Clinical evidence for choosing eakin dot® 1-piece flat:

- *skinsmart*™ hydrocolloid for longer-life wear is clinically proven to offer greater security and improved pouch wear-time compared to other hydrocolloids available²
- Moulds well to peristomal skin creases and folds²
