The Netherlands

# Choose eakin dot® 1-piece to resolve frequent leaks\*

**\*The patient in this case study was assessed and advised by a stoma therapy nurse.**

## 4 reasons to use:

1. Stays on securely for longer, helping prevent leaks<sup>1,2</sup>
2. Less time spent on pouch changes<sup>1,2</sup>
3. Improved peristomal skin<sup>1,2</sup>
4. Improved quality of life<sup>1,2</sup>

## Patient History:

- 17-year-old girl
- Severe intractable constipation
- Dec 2020: Formation of permanent end ileostomy
- Feb 2021: Reduced stoma production as a result of mechanical obstruction at the fascia level. Stoma refashioned.

## Problems:

- Tried numerous 1-piece products unsuccessfully
- Frequent leakages resulting in peristomal skin irritation
- Daily pouch changes and increased anxiety

Before using eakin dot® 1-piece

## Success with eakin dot 1-piece flat:

- Leakages and peristomal skin irritation resolved
- Longer wear time - pouch changes reduced to every 3 days
- Fluted baseplate flexes to body contours
- Feeling secure and confident

After using eakin dot® 1-piece

*"[She] was very satisfied and more relaxed after use of eakin dot® 1-piece"*

Marijke Voskeuil

## Clinical evidence for choosing eakin dot® 1-piece soft convex:

- *skinsmart™* hydrocolloid for longer-life wear is clinically proven to offer greater security and improved pouch wear time compared to other hydrocolloids available<sup>2</sup>
- Flat baseplate feels light on the skin. Fluted baseplate moulds to body contours.<sup>2</sup>

A SMALL PART  
OF A BIGGER LIFE
