

1-piece high output system

Choose eakin **dot**[®] high output for increased wear time and pouch capacity

4 reasons to use:

1. Increased wear time, pouch capacity and overall quality of life
2. Leakages prevented
3. Secure and comfortable to wear
4. Offered more control and independence

Case study submitted by:

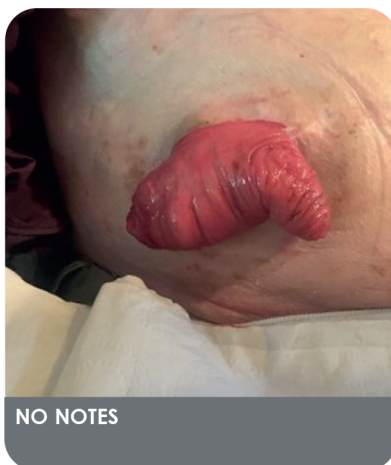

Kate Slattery, Stoma Nurse Advisor,
TG Eakin Ltd., Ireland

1. eakin dot[®] 1-piece nurse case study, Data on File, 2021

2. eakin dot[®] 1-piece high output user evaluations, Data on File, 2019

Patient History:

- **72-year-old** gentleman
- **Feb 2018:** Loop ileostomy and bowel resection for cancer
- Originally using standard 1-piece soft convex pouch with an eakin cohesive Stomawrap

NO NOTES

Problems:

- Jul 2020 : cancer progressed, and gentleman was referred to palliative care
- Bone metastasis and general disease progression and deterioration resulted in lack of mobility
- Pouch was over-filling and leaking resulting in great distress and anxiety
- Gentleman was eager to maintain his dignity and as much independence as possible regarding his pouch changes

NO NOTES

Success with eakin dot high output:

- Trained high output pouch to increase capacity and reduce frequent need for pouch to be emptied
- Felt in control by leading the pouch change and emptying his pouch twice daily, directing his carer when needed
- No leaks occurred
- Gentleman felt secure, comfortable and reassured that his stoma wasn't impacting his independence or dignity.
- Pouch changed twice a week

Clinical evidence for choosing eakin 1-piece high output system:

- *skinsmart*[™] hydrocolloid for longer-life wear is clinically proven to offer greater security, pouch wear time and skin-friendliness compared to other market leading pouches
